

ELECTION OF INVENTIONS:

The Patent Examiner has required the selection of one of the following inventions for further prosecution:

- Group I: Claims 34-37, drawn to nitrogen oxygen carbon polymers;
- Group II: Claims 38-40, drawn to metal complexes;
- Group III: Claims 41-42, drawn to catalysts consisting of the complexes;
- Group IV: Claims 43-45 and 62-65, drawn to electrodes consisting of the catalysts;
- Group VI: Claims 46-49, drawn to a process for preparing a nitrogen oxygen carbon polymer.
- Group VII: Claims 50-54, drawn to a process for preparing a complex;

Group VIII: Claim 55, drawn to a process for
preparing a catalyst;

Group IX: Claims 56-59, drawn to a process for
preparing an electrode;

Group X: Claims 60-61, drawn to electrodes.

Apparently, the Examiner misnumbered the groups so there is
no Group V.

ELECTION:

Applicants respectfully elect, with traverse, the invention
of Group IV, Claims 43-45 and 62-65, drawn to electrodes
consisting of the catalysts, for further prosecution.
